SUMMARY

Frontend Developer and Computer Programming graduate with experience building responsive web applications using React.js, Angular, Vue.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, and Node.js. Skilled in developing modern user interfaces, integrating REST APIs, troubleshooting technical issues, and collaborating in team environments. Passionate about building scalable, high-quality web applications and continuously learning modern frontend technologies.

PROJECTS

Netflix Clone (React.js, Firebase, TMDB API)

- Built a Netflix-inspired web application using React.js, Firebase Authentication, and the TMDB API.
- Developed reusable React components and responsive user interfaces.
- Integrated REST APIs to retrieve and display dynamic movie and TV show data.
- Deployed the application on Vercel using GitHub for version control.

E-Commerce Website (HTML5, CSS3, JavaScript)

- Developed a responsive e-commerce website using HTML5, CSS3, and JavaScript.
- Designed interactive product listings and intuitive user interfaces.
- Implemented responsive layouts to improve usability across desktop and mobile devices.
- Published the project using GitHub Pages.

Currency Converter (JavaScript, Exchange Rate API)

- Built a real-time currency converter using JavaScript and Exchange Rate API.
- Integrated live exchange rate data for accurate currency conversion.
- Implemented input validation and responsive user interface design.
- Developed a responsive interface compatible with desktop and mobile devices.

Restaurant Website (HTML5, CSS3, JavaScript)

- Designed and developed a responsive restaurant website using HTML5, CSS3, and JavaScript.
- Built interactive navigation and user-friendly layouts.
- Optimized the interface for desktop and mobile devices.
- Published the live website using GitHub Pages.
